SILVERZAP

Is a safe, natural and healthy way to improve your life. It disinfects your drinking water, effectively killing bacteria, fungi, viruses and single-celled parasites.

- ✔ It does not change the smell or taste of water.
- ✔ It is non toxic.
- ✔ Contains silver ions in deionized ultrapure water.

How to use Silverzap

- ✔ Silverzap is a 10 ppm (10 mg/l) strong product.
- ✔ One bag (10 ml) equals 0.1 mg (100 ug) of silver.
- ✔ Add the content of a bag (10ml) of Silverzap to 1 liter of water, then shake or stir. Let the product work for 15 minutes.
- ✔ After that, the water is safe to drink.

Silverzap is not a silver salt based product. It is an electrically produced ionic silver product known as a silver hydrosol.

Using data from WHO, EPA and other sources, it is shown that these small amounts of silver ions in the water, do not have any negative health effects.

Keeping your drinking water healthy and fresh!
